

The 13th UNFCCC-GIR-CASTT Programme on Greenhouse Gases

UNFCCC-GIR-CASTT* Programme on Greenhouse Gases

*Climate Action and Support Transparency Training

Offered in collaboration by the secretariat of United Nations Framework Convention on Climate Change (UNFCCC) and Greenhouse Gas Inventory & Research Center of Korea (GIR) from 2017, UNFCCC-GIR-CASTT Programme on Greenhouse Gases (GHG) is a professional training on GHG inventories for national experts from developing countries.

GHG inventory is a key source of information which is essential to understand where each country and the global community stand in terms of GHG emissions. Through a tailored and focused approach, the training programme aims to significantly boost the technical capacity of developing countries in preparing and reporting high-quality GHG inventories.

Since 2017, 190 trainees from 86 countries have successfully completed the training, and they are contributing lessons learned from lectures and hands-on experiences to their home countries to enhance their national capability responding to climate change.

The organizational collaboration will serve as a model for delivering a targeted professional training programme, and for future South-South cooperation that responds to the training needs of developing countries in Measurement, Reporting and Verification (MRV) under the Enhanced Transparency Framework (ETF).

Key Programme

- Reporting and Review under UNFCCC and Paris Agreement
- GHG Inventory Compilation
- Sectoral GHG Estimation Methodology
- GHG Projections
- Group discussion and exercises
- Country presentations

Eligibility

- Current government officials, consultants and researchers of UNFCCC Non-Annex I Countries who are involved in climate transparency related activities
- Relevant experience in preparing GHG inventory or climate change response related field
- Entry- to mid-level professionals
- Bachelor's degree or higher
- Intermediate or advanced level of English proficiency (Candidates will be required to attend an English interview virtually)
- Intermediate-level IT proficiency

Training Fee

Training fees including flights, accommodation and lectures will be supported and provided by GIR and UNFCCC.

Application

Applications will be open for 3 weeks on 10 - 30 April 2023.

Application form and required documents must be submitted by 30 April 2023 (KST 23:59).

Please fill out an online form at the following link.

<https://sites.google.com/view/unfcccgircastt/apply-now>

After submitting the form, please send the required documents to unfcccgircastt@gmail.com

Key Dates

Application Period	10 - 30 April
Arrival of Trainees in Korea	8 - 9 July
Training Period	10 - 28 July
Departure of Trainees from Korea	29 July

Required Documents

Please submit all required documents as follows:

1. Curriculum Vitae (CV)
2. Certificate of Employment
3. Latest academic degree certificate
4. Copy of your passport
5. Letter of Recommendation (Download the template)
6. Emergency Contact Form (Download the template)
7. Proof of English proficiency
(Except countries of which official language is English)
 - English proficiency test certificate (e.g. TOEFL, IELTS), or
 - Certificate of bachelor's degree or higher in a country where English is spoken as its official language

Please note that your application is valid only if ALL required documents are received by the Secretariat by 30 April via email at unfcccgircastt@gmail.com

About GIR

As a government institute, Greenhouse Gas Inventory & Research Center (GIR) serves as a think tank on GHG inventory and mitigation. GIR compiles and oversees Korea's national GHG emissions, provides expertise in establishing national and sectoral GHG reduction targets, and conducts research on Korea's Emissions Trading System (K-ETS).

For global cooperation, GIR has been organizing its unique GHG training programme and International Greenhouse Gas Conference (IGC) since 2011.
